

I keep my workplace clean and tidy.

Do I have my safety glasses with me? I wear them when: working with chemicals, cleaning with compressed air, mechanical risks, ...

I wear hearing protection where needed!

I always hold the stairs' handrail.

Fire extinguishers, emergency showers, electric cupboards, ... I always keep them free.

SAFETY STARTS WITH EACH OF US INDIVIDUALLY

SAFETY FIRST

I clean up hoses and reels immediately after work is done.

I immediately report dangerous situations to my responsible, I immediately stop unsafe work! If uncertain, I ask for explanation.

I think before I act.

Chemicals: I know what I'm doing.

I wear my fluorescent jacket. I am visible and polite in traffic: on site and on public roads.
